

THE AHH-QUA SOLUTION

QUARTERLY NEWSLETTER OF UNIQUE SOLUTIONS, USA

The magic of science in every container.

Welcome

We've been doing great things here at Unique Solutions, USA! Cheers to our very first quarterly newsletter, "The Ahh-Qua Solution," where we plan to educate you on all there is to know about our company and products. Thank you for taking the time to read about our latest and greatest news.

For those of you who don't know me, my name is **Jerry Parker**, Owner and President of Unique Solutions, USA. My wife, Karen, and I reside in Vero Beach, FL where we are semi retired enjoying life with our two dogs, Mia and Putter. We have 6 children, 15 grandchildren and 1 great grandchild. When I'm not working, you can find me playing another round of golf, playing my guitar or reading a book.

I started Unique Solutions, USA in 1995. I took a chance to make and sell environmentally safe bio-cleaners and clarifiers for hot tubs, swimming pools and jetted tubs. With a lot of hard work and teamwork from many, our Ahh-Some products have become the last industrial strength pipe and jet-cleaner one will ever need! Unique Solutions, USA also specializes in the private labeling industry of our products for interested parties.

To our dealers and customers, THANK YOU! Thank you for trusting in us and our products to help keep your property and your health clean and well maintained. We look forward to working with you for many years to come!

Why Purge a Brand New Hot Tub?

We get asked often, "Why should we purge our brand new hot tub?" All hot tubs are wet tested prior to leaving the factory they were manufactured in. This test ensures that all valves, seals and pumps are operating properly. After only a few hours, the residual untreated water remaining in the systems plumbing will start to develop bacteria which, left untreated, will lead to bio-film. Some tubs take 4 to 6 weeks to get from the manufacturer to the dealer and then to the customer. In this time, you have a potential soup of bio-film already growing in the plumbing system. This often times leads to new tub owners already being at a disadvantage when it comes to their water chemistry. Dealing with cloudy water, green water, smelly water is not how you should begin your journey of hot tub ownership. Just like starting up a brand new car for the very first time... everything looks great on the outside, but if you don't have oil in the engine, this is going to lead to problems. Start your hot tubbing on the right track and purge that plumbing right away using Ahh-Some. Then, ENJOY your hot tub!

What's New?

Let's first talk about our Team. **Jim Parker**, National Sales Manager and Jerry's oldest son, has been working at Unique Solutions, USA for 3 years now.

His wife, **Amy Parker**, joined the Team as Administrative Assistant in April 2021. Jim and Amy live in Kindred, ND and have 8 children, 1 grandchild and 3 pups. When they aren't attending their kids' activities and when the weather is right in ND, they love to spend time together on the golf course. Jim enjoys reading and gardening while Amy spends her free-time scrapbooking. Traveling together is something they are both looking forward to doing again after COVID put a pause on that. Pictured here are Jim and Amy with 7 of their children, Adrian, Kameron, Jayden, Jaxon, Kensey, Kierra and Jeremy. *Not pictured: Daughter, Keiley, her husband, Devon, and their son, Grayson.*

Team growth allows for more tasks to get accomplished and that's just what we've been doing.

Check out our new **website** at <https://ahhsome.com>. It is pretty "Ahh-Some" if we don't say so ourselves!

In addition to our main website, we have also launched a new **online dealer portal** where dealers can register and order products online! Dealers, if you haven't done so already, go to <https://dealers.ahhsome.com> and click on "Login or register here" to get started. If placing your orders online doesn't "catch your wave," we are always here to take your order over the phone or email. Please contact us at 860-896-0836 or jim@ahhsome.com and we are happy to help.

Our next project we will be working on soon is our very own **Blog**. We are excited to get started on this to provide you our thoughts on various topics. Watch for more news on this in the upcoming months!

New Product Launch:

Ahh-Some Single Use Hot Tub Purge Packet

Our NEW Ahh-Some Single Use Hot Tub Purge Packets are available NOW! One packet includes enough product for a one-time purge (up to 450 gallons) that rids the hot tub from the overwhelming harmful contaminants, body & bath oils, black flakes, soap scum residue stains and provides protection from scale and microorganism build-up. This can also be used in one's jetted bathtub.

Depending on the size of the tub, a customer will get up to 6 cleanings with just one packet. Just like all of our Ahh-Some products, this, too, is an eco-friendly cleaner and is septic safe.

Dealers, place your order right from your Ahh-Some Dealer Portal! Maybe you want to consider including a free packet to new hot tub buyers for them to use for their first water "drain and refill" purge.

You can also find more information on this new product on our website, www.ahhsome.com.
